Software Developer

Eager Junior Software Developer with hands-on development experience, ready to excel in a role that combines technical challenges with opportunities for career progression. I aim to leverage my multi-disciplinary experience in the sciences towards building software with a focus on innovation and growth.

Skills

- **Programming Languages:** Python (including Pandas and Matplotlib), React.js, TypeScript, JavaScript (ES6), HTML/CSS including Tailwind CSS, and Java
- **Tools & Technologies:** Docker, RESTful APIs, Cloud Environments, Git, Linux, YAML, IntelliJ
- **Database Knowledge:** SQL including PostgreSQL and MySQL, and NoSQL databases including MongoDB
- **Other:** Arduino and circuit design including basic C for integrated systems, Blender for 3D design, 3D Printing

Education and Certifications

University of Maryland ◇ College Park, MD

May 2023

Bachelor of Economics | *Minor: Astrophysics* | College Park Scholar (Life Sciences), Eagle Scout

Selected Coursework: Introduction to Computing, Object-Oriented Programming I, Computer Programming via the Web

Additional Coursework: The Odin Project, Harvard CS50AI

Professional Certifications: AWS Cloud Practitioner, Google IT Certificate

Projects

YouTube Clone – Deployed on Google Cloud and Firebase

- Developed video streaming clone using ffmpeg processing via Node.js in Google Cloud Run using Pub/Sub and Cloud Storage with Firebase Auth
- Designed and implemented microservice architecture for secure data validation and transfer among Google Cloud Services
- Implemented front-end in React and NextJs, with REST APIs via Firebase Functions, including user authentication with Google sign-in, video upload, metadata transferal, and communication via Pub/Sub to reduce instance load

danyalahmed.dev

- Developed personal website using Typescript in React with Next.js, hosted on Vercel, utilizing server-side rendering and static caching to optimize performance
- Designed and implemented custom UI using handpicked palette, ThreeJS using custom Blender models, Framer Motion, and TailwindCSS, with emphasis on accessibility standards, load time, and Lighthouse scores

Professional Experience

Manager - Magoo's Pub & Eatery

2018 – Present

- Supervises teams of up to 6 employees serving 200+ clients per day
- Designed training processes and onboarding for 20+ new employees
- Completes extensive sales accounting and vendor communication, leading to increased responsibility as keyholder and daily lead management of the restaurant

Co-Founder - Library of Babel Tapes

2017 – 2019

- Worked with co-founder to contact and promote artists, as well as price, convert, and distribute cassettes to customers and distributors
- Oversaw and organized revenue streams using Shopify and Stripe, as well as the allocation of funds towards inventory, supplies, distribution, and artist compensation
- Led initiative to build outreach and expand artist/vendor network in Boston industrial music community that led to a 150% increase in revenue after first year of business
